

way you are

by kris orlowski

love the way you are
love the way you see
love the little pain inside of me
whistle when you walk
something in you sweet
caught up in the ways we can't relate

when you want what you fear you're not alone, you're not alone, were not alone
When I am gone, I am still near, you're not alone, you're not alone, were not alone
i love the way you are

love the way it sounds, the moments you're with me, like soft wind brushing waves across the sea
but only for a while, why can't we just remain, caught up in this world on different plains
come on feel fire, let go of the weight, don't analyze, realize that we relate,
like angels in a choir, rejoice and voice our fate
caught up in the ways we can't relate

when you want what you fear you're not alone, you're not alone, were not alone
When I am gone, I am still near, you're not alone, you're not alone, were not alone
i love the way you are

when you want what you fear you're not alone, you're not alone, were not alone
When I am gone, I am still near, you're not alone, you're not alone, were not alone
i love the way you are

come on feel fire, let go of the pain
come on feel fire, let go of the pain
